

# SWOT BULLETIN

The Side-Winders-On-Two Radio Club formed in the mid-1970's and has members nationwide. We promote Single Sideband activities on the 2-Meter (144 MHz) Amateur Radio band. SWOT conducts Nets across the United States on or near 144.250 MHz USB and has over 3,600 registered members worldwide. This Bulletin is provided for our members and those interested in 2-Meter Sideband activities.

PROMOTING SSB, CW & DIGITAL OPERATIONS ON 144MHz AND UP

WINTER 2016

6 ELEMENT PORTABLE / ROVER 144MHz YAGI BY M0UKD

If you have something to add to the next Bulletin it is much appreciated. Please submit anything of interest and news for the Bulletin to KA5DWI.

# SWOT BULLETIN

## 6 ELEMENT PORTABLE / ROVER 144MHz YAGI BY M0UKD

This page contains construction details on a 2 metre 144MHz VHF Yagi beam antenna, designed for portable use. This is the second version John, M0UKD has built for use as a portable antenna. The first version was 5 elements while this one is 6.

Since this antenna was to be used for portable operations it needed to be a compact unit so it could be carried up the side of a mountain and also be easy to assemble. This version is for the SSB portion of 2M around 144.3MHz.

# SWOT BULLETIN

## Real Time 2-Meter DX Map for North America

Always report VHF/UHF DX via Telnet or the DX Cluster. These maps will display these DX reports. It is a good alternative to the Live MUF program

## Real Time National Weather Service Radar Mosaic

Plus a "How to use it for Tropo" narrative.
